BMGT 70701 Advanced Management I

Deals with theories and techniques for analysis of information requirements and design, development, and implementation of computer-based information systems. Examples are life cycle, prototyping, end-user computing.

BMGT 70711 Advanced Leadership

Deals with techniques and procedures of information necessary in being an effective leader. Topics will include personnel relations, development, maintenance, utilization of the labor force, and presentations.

BMGT 70721 Advanced Management II

This course includes comprehensive coverage on treatment of labor and employment law. It explores pay equity, and age discrimination, disability discrimination law and workers' compensation, and employee privacy topics.

BADM 70701 Advanced Business Communication

The course extends the study of communication knowledge and skills necessary to communicate as a manager in a contemporary organization. Topical coverage includes the role of verbal and nonverbal language, perception, listening, and media choice.

BADM 70731 Advanced Statistics

An advanced study of the collection and organization of business and economic data; descriptive statistics; measures of central tendency and dispersion; statistical inference; probability time series; index numbers, and regression and correlation.

BADM 70751 Advanced Organizations

Contributions of both formal theory of organizations and the behavioral sciences are examined as they impact upon organizational functions and processes.

CSCI 70751 Advanced Management Information Systems

This course provides students with clear explanations of basic business concepts that they need to know in order to fully comprehend the role of information systems in business.

DISS Dissertation

The Dissertation.

“Stop thinking in terms of limitations and start thinking in terms of possibilities”
- Terry Josephson, 20th/21st-century motivational author
